"You work three jobs?... Uniquely American, isn't it? I mean, that is fantastic that you're doing that."

-- George W. Bush, to a divorced mother of three, 2/4/05

THE REALITY: *The middle class is dying.*

- 66% of the income growth during from 2000 -2007 went to the wealthiest 1% of all Americans.
- The top 1% of Americans by net worth hold about a third of American wealth.
- More than 40% of Americans who are employed are now working in service jobs such as cashier, which are often very low paying.
- Approx. 21% of all children in the United States are living below the poverty line in 2010 - the highest rate in 20 years.

THE REASON:

For too long now, we have rolled over as supremely wealthy individuals and corporations funded elections and "bought" our Representatives. *In our silence we have cooperated.*

THE RESPONSE:

Our silence ends now. Please join us on November 5th and, with your presence, tell our Representatives that they MUST stand firm against the assault on the middle class.
